Land Suited to Cultivation and Other Uses: Class VIII

Class I - soils have few limitations that restrict their use.

Class II - soils have some limitations that reduce the choice of plants or require moderate conservation practices.

Class III - soils have severe limitations that reduce the choice of plants or require special conservation practices, or both.

Class IV - soils have very severe limitations that restrict the choice of plants, require very careful management, or both.

Land Limited in Use-Generally Not Suited to Cultivation:

Class V - soils have little or no erosion hazard but have other limitations impractical to remove that limit their use largely to pasture, range, woodland, or wildlife food and cover. Class VI - soils have severe limitations that make them generally unsuited to cultivation and limit their use largely to pasture or range, woodland, or wildlife food and cover. Class VII - soils have very severe limitations that make them unsuited to cultivation and that restrict their use largely to grazing, woodland, or wildlife.

Class VIII - soils and landforms have limitations that preclude their use for commercial plant production.
